### **CLF10 sc: Free reagentless chlorine sensor**

The CLF10 sc Free Chlorine Analyser measures free chlorine continuously for real time process control. It is based on amperometric technology and is fully compatible with all of Hach's digital SC controllers. The CLF10 sc can be used in most municipal and industrial applications, and is best utilised where waste stream management is a constraint.

Hach's self diagnostics alerts you when the process has changed or the instrument needs servicing. Diagnostic features include the Cal Watch algorithm for warning of pH and chlorine calibration deviation and a non-contacting sample flow sensor for notification of insufficient sample flow. All warnings are easy to configure.

#### **Disinfection under control**

Hach's self diagnostics alerts you when the process has changed or when the instrument needs servicing. Diagnostic features include the Cal Watch algorithm for warning of pH and chlorine calibration deviation and a non-contacting sample flow sensor for notification of insufficient sample flow. All warnings are easy to configure.

#### **Minimal operation costs**

The amperometric sensors monitor chlorine concentration continuously without reagents. There is no need to replace reagents nor to manage disposal. This saves time and keeps operation costs at a low level.

#### **Plug and play**

The sensors are designed for all Hach digital SC controllers so you only need one controller for all measurements. They are easy to operate, no matter if measuring turbidity or chlorine. Hach SC controllers have no complicated wiring or setup procedures. Just plug in any Hach digital sensor and it's ready to use without software configuration.

#### **Real-time process control**

Continuous readings indicate when treatment conditions have changed allowing CLT10 sc and CLF10 sc a real-time control of disinfection processes.

#### **EPA compliant according to Method 334.0**

In accordance with the US EPA Method 334.0, the sensors can be used for reporting chlorine residual measurements.
