Nearno

Maintaining good water quality is essential for profitable fish production. In many cases, the availability and cost of "crop" insurance is directly related to testing programs.

**Designed to meet the demands of specialized salt-water applications**

**Each kit includes the apparatus and reagents necessary to measure 10 critical parameters using digital titrator, titration, and color disc methods**

**Two tests, ammonia-nitrogen and a convenient chloride titration test for salinity, have been designed exclusively for this kit**
